

# FENCE & GARDEN PLIERS

BY RAPID

# KNOWING THE MARKET

## **We are the fastening specialist**

Rapid started with office staplers more than 80 years ago, and over the years the range developed to include a broad range of tools such as staple guns, glue guns, riveting pliers, fence pliers and the consumables.

Choosing Rapid means choosing a reliable specialist with proven solutions specially adapted for the user. As specialist we consistently outsell and outperform all competitors. There are a number of reasons why this is the case. We are driven by care for our users and a thirst for innovation. Furthermore, the majority of Rapid products, such as our fence pliers, are designed with the highest attention to ergonomics and functional design. Our hogrings are available in a number of different dimensions and coatings to accommodate any situation or requirement – a fact that gives extra piece of mind.

## **We listen to the users**

Our range of fence pliers is the result of listening carefully to the needs of our target groups – in this case DIY users who value clever solutions that simplify their work. Although the types of work they do might differ, they're all looking for features that make the jobs of any kind easier and faster. We continuously develop and produce new solutions, keeping up with the demands and requirements of our users.

## **We present the complete picture**

Broadening scope and seeing the full picture is a Rapid trademark. We're not only specialists when it comes to our products; we're also skilled in the art of tailoring solutions that guarantee additional sales. In the store environment, it should always be clear that we offer customers not only individual products, but also entire fastening systems. Products, packaging and displays are designed to attract interest, inform and guide, because when the store visitor is given relevant information, the chances for a sale increases.

## **So many applications**

Fencing and gardening applications are used in a variety of projects ranging from simple repair of nettings to fairly advanced building and decoration. Not all end-users are experts, they need to be guided, let's do that together. We show you how in this brochure.

# APPLICATIONS

Fix a bamboo screening on fence

**SMALL JOBS & REPAIRS**

Rapid provides compact and ergonomic pliers that are suitable for smaller jobs.

Even smaller job requires a tool that is adapted for repairs, netting fixing, decorations or bag closing.

Repair an old damaged fence

Attach a protective net around fruit trees

# APPLICATIONS

Build a sheep park

## PROTECT YOUR PETS

Fix thinner chain-link mesh fencing or netting for animals and agricultural fencings like barnyard, birdcages, chicken coop, rabbit hutch or sheep park.

Each application requires a specific hog ring depending on the wire diameters.

This type of fence is often made with a thinner wire. The hog ring Rapid VR16 with a closing diameter of 2-8 mm is the best choice. To be used with the fence pliers FP216.

Protect your trees in the garden

Secure little pets from predators

# APPLICATIONS

## PROTECT & DELIMIT YOUR OUTDOOR SPACES

Fix long areas of medium and heavy duty chain-link mesh on tensile wire, mainly for higher protection of residential, professional, publics and sport facilities

Fence pliers can be equipped with a magazine that makes easier and faster long lasting jobs. The hog ring Rapid VR22 with a closing diameter of 5-11 mm is the best choice. To be used with the fence pliers FP222.

Publics

Sport facilities

# APPLICATIONS

Secure

Arrange

Guide

**FIX YOUNG PLANTS**

Guide growing branches, secure your flowers or tomato plants without crushing stems and allow them for growth. The VR38 hog ring wire is flexible and expands with the plant while growing.

Perfect also for flower arrangements and decorations.

Decorate

# THE FIXING SYSTEM

## QUICK

Our way of fixing the wire together is two times faster than the traditional way of twisting a link of wire. Imagining you have to prepare the number of wire pieces to be twisted each 50 cm along the tensile wire and then twist each piece with a plier. It will take a certain

time. Rapid fence pliers just need to be loaded with a strip of corresponding hog rings, one hand pressure to squeeze the trigger and the hog ring is fixed to maintain the fence on the tensile wire. Then move towards 50 cm far away and repeat again.

With a Rapid plier

Without a Rapid plier

## EASY

Quick and easy to load.

## SAFE

Closed hog rings without risk to harm you, which can be the case with a twisted wire. A safe and good result.

With a Rapid plier

Without a Rapid plier

# INGENIOUS SYSTEM

## CUT WIRE FUNCTION

For FP20 / FP216 / FP222

Allow to cut the tensile wire at the right length.

## LOADING INDICATOR

For FP216/FP222

Indicate the number of hog rings left in the magazine.

A good help to make sure you have enough hog rings with you.

## INTEGRATED MAGAZINE

For FP216 / FP222 / GP238

The magazine is integrated together with the plier. This gives the advantages of no loose parts and it's always ready to use.

This system eliminates the problems caused by using a loose magazine fixed to the plier with a loose nut.

## CLOSING PRECISION CONTROL - 3 POSITIONS

For GP238

Allow to control the closing diameter of the hog rings ( $\varnothing 6/11/16$  mm) according to the thickness of the stem and the support.

## FP222

For more demanding tasks such as fixing thicker wire netting or chain-link fencing, these fence pliers are a tough, reliable solution that delivers great results. A high capacity heavy-duty hog ring magazine for 50 hog rings, ergonomic soft handle and handle lock for easy storage optimize performance and comfort. Designed for use with VR22 hog rings with a 5-11 mm closing diameter.

## FP216

These reliable, easy-to-use fence pliers are ideal for fixing thinner chain-link mesh fencing or netting for animals and agricultural fencing like barnyard, bird cages, chicken coop, rabbit hutch or sheep parks. A high capacity hog ring magazine, ergonomic soft handle and handle lock for easy storage optimise performance and comfort. Designed for use with VR16 hog rings with a 2-8 mm closing diameter.

## FP20

Versatile, great value and easy-to-use – our FP20 fence pliers are compatible with VR16 and VR22 hog rings, making them ideal for a number of small applications around your property : small repairs, protective netting fixing, decoration activities and bag closing. Magazine-free operation, an ergonomic soft handle and handle lock for easy storage make these pliers an effective, comfortable solution to fix all wire fencing, from lightweight to heavy duty chain-link mesh, on tensile wire.

## GP238

Designed to make garden work easier and more comfortable, these great value, reliable pliers are ideal for fixing young plants, securing branches or attaching netting. Handy 3-position locking function means that securing can be made without damaging the plant while a quick load magazine and lock for easy storage enhance user convenience. Designed for use with VR38 hog rings.

## HOG RINGS

Rapid's high quality hog rings are an effective solution for different fencing and gardening applications. The hog rings are available in a number of different dimensions and coatings to accommodate any situation or requirement.

### FENCE HOG RINGS VR22

- Galvanized, high quality hog rings
- An effective solution when fastening thicker wire onto fencing mainly for higher protection of residential, professional, public and sports facilities
- Suitable for use with netting wire 5-11 mm in diameter
- Also available in green, grey and black plastic coated finish, for discreet fixing of colour fencing
- Designed for use with FP20 and FP222 Fence pliers

### FENCE HOG RINGS VR16

- Galvanized, high quality hog rings
- An effective solution when fastening thinner wires like pet protections
- Suitable for use with netting wire 2-8 mm in diameter
- Also available in green plastic coated finish, for discreet fixing of colour fencing
- Designed for use with FP20 and FP216 Fence pliers

### GARDEN HOG RINGS VR38

- Bright hog rings
- Perfect for securing 6-11-16 mm stalks
- Flexible wire, expands with the plant while growing
- Designed for use with GP238 Garden pliers
